LOCATION, LOCATION, LOCATION – NO PROBLEM.

Zippers, buttons, & seams – let us show you more ways to decorate using logos.
Have a variety of promo products that need the same logo? No problem. We can logo anything. Full color digital logos are the best solution for decorating promotional merchandise like apparel, caps, tote bags, computer cases, aprons, backpacks, umbrellas, luggage tags, and much more. Full color digital logos adhere to hard-to-decorate fabrics, including nylon, neoprene, and polypropylene.
STRETCH FOR PERFORMANCE
FULL COLOR DIGITAL SUPERTEK™

Designed for technical fabrics and performance wear, full color digital SuperTEK™ logos provide a lightweight, ultra-soft feel that features incredible stretch and rebound. It’s perfect for decorating uniforms, fan wear, performance and corporate apparel. If it can’t be screen printed or embroidered, this is the ideal decorating solution.

1. CAD-PRINTZ® FoilTEK™ Metallic Silver
2. CAD-PRINTZ® SuperTEK™ Opaque
3. CAD-PRINTZ® FoilTEK™ Metallic White

The SuperTEK™ line was specially designed with a low application temperature for printing on neoprene, nylon, even Lycra®/spandex.
SPECTACULAR, ATTENTION-GRABBING

CUSTOM CUT LOGOS & SPECIAL EFFECTS

Mix and match media to create stunning visual effects that let your clients’ logos and designs truly stand out. Sparkling glitter, metallic sheens, holograms, and bright neon colors in a variety of versatile, durable materials allow you to promote the power of any logo. This is a great solution for two-tone, and one, two, and three-color special effect logos.
Adding texture to a logo can strengthen its visual and physical appeal. Mix and match from a huge selection of finishes and textures for a contrasting look and feel.
STITCH IN SPECIAL EFFECTS

RIP-AWAY APPLIQUÉ™

1. CAD-PRINTZ® Express Print® w/ Satin Stitch
2. CAD-CUT® Flock w/ Satin Stitch
3. CAD-CUT® 3M™ Scotchlite™ Reflective 5807 w/ Satin Stitch

Take traditional embroidery to the next level. Combine our popular lines of Glitter Flake™, Thermo-FILM®, Flock, 3M™ Reflective, or full color digital logos for a multi-color, multi-textured look. Add any color satin stitch, including metallic and variegated threads, to make vibrant mixed media designs.

DID YOU KNOW?
Rip-Away Appliqué™ is an easy process that will get noticed every time.
STYLISH, UPScale LOGOS
CLASSIC & DISTRESSED APPLIQUÉ

Showcase logos with the prominent retail look of appliqué. Whether it’s the traditional look of Classic Appliqué or the edgy, worn-out appearance of Distressed Appliqué, custom creations are easy to achieve and are available in a variety of colors and fabrics.

1. Felt on Twill w/ Bean Stitch
2. Screen Printed Twill w/ ZigZag Stitch
3. Felt on Chino w/ Decorative Stitch

DID YOU KNOW?
Layer materials like Felt, Twill, and Chino Twill to create an appliqué design with a unique look and feel.
VINTAGE NEVER LOOKED SO GOOD

PRE-CUT FELT & PRE-SEWN JERSEY ON TWILL

Worn-out, vintage looks don’t need time to age. Pre-sewn distressed letters and numbers make it easy to achieve the upscale, vintage looks found in retail stores. Get that sought-after hard-worn look in seconds without the need to sew or embroider. These durable one and two-color letters and numbers feature a soft hand, getting softer and more distressed with every wash cycle, so they’ll look even better with age.
Embroidery is a time-honored decorating technique that adds an exclusive quality and professional look to a variety of garments. Incorporate different stitch patterns and thread colors for added depth. Choose multi-colored stitching for uniforms, or more subtle tone-on-tone color for corporate logos.
Screen printing continues to be a popular and economical solution for apparel decorators looking to fulfill medium to high-volume orders. With advances in techniques and a growing variety of specialty inks, screen printing made its first appearance in China during the Song Dynasty, circa 960 AD.
Don’t let decorating locations restrict you. Get creative and screen print garment shoulders, sleeves, side panels, and yokes. Or enhance screen printed designs with dual process decorating, such as heat transfers or embroidery. Give your logo depth and texture, that’s sure to leave a lasting impression.
Event or work uniform decoration is easy when you use custom or stock transfers. With this decorating method, you’ll receive a level of washability and durability that will outlast the life of your garment. With the ability to print as needed, there is no inventory of pre-prints.

DID YOU KNOW?
The most common ink used in commercial garment decoration, Plastisol, is the same ink used in producing heat transfers.
If you’re in the market for personalized team, corporate, and fan wear, rise above the competition with the ultimate variety in names and numbers. This simple, cost-effective decoration method is available in the latest fonts, styles, sizes, colors, patterns, textures, and finishes.

Letters and numbers aren’t just for jerseys. Decorate trendy billboard T-shirts that can be sold in the collegiate, resort, and fashion markets.

2. Pre-Spaced Application
3. Pre-Spaced Text & Numbers with SimStitch® Number Background
EXPLODING WITH VIBRANT COLORS

SUBLIMATION TRANSFERS

Multi-color logos and designs are perfect for sublimation, which is quickly becoming a popular decorating solution. This exciting technology permanently fuses an entire design, logo, or pattern to a garment, and is so soft, it has virtually no hand. Sublimation logos and designs will stay bright and vibrant wash after wash.
IT TWILL ALL BE WORTH IT

PERMA-TWILL® & TEXTURE-TWILL™ PATCHES

1. CAD-PRINTZ® Perma-TWILL®
2. CAD-PRINTZ® Perma-TWILL® w/ Distress Edge
3. CAD-PRINTZ® Texture-TWILL®

Logos and shields with intricate, fine detail and vibrant colors are perfect for creating patches. Whether it’s traditional Perma-TWILL® or Texture-TWILL™, both provide a permanent adhesive. To enhance the patch, add optional stitching to create a prestigious look that stands out.
