TOP 10 TIPS

FOR WEEDING CAD-CUT® MATERIALS

1

Use a flat well-lit table to weed on

2

Hold the Stahls' EZ-Weeder™ at an angle when weeding

Weed interior cavities of letters first

when working with pressure sensitive materials

3

Secure a long edge of the material on the carrier to prevent material breakage

4

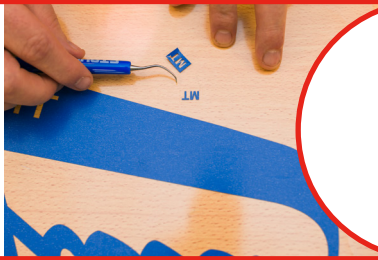

5

E ←

Pull into open areas of the letters for easier weeding

Use weed borders to control small areas of a larger design

6

7

Stack weeding scraps on Stahls' EZ Weeder™ to speed up the process

Save a sticky carrier to discard weeding scraps away from the work area

8

9

Keep scissors clean to trim apart designs once completed

Use Pink Liner to stick weeded designs to for storage.

Psst... It's in the box from Stahls' Order Factory Direct at cadcutdirect.com
