

CAD-COLOR® Soft Opaque II

Thin, stretchable, & printable – for light or dark garments

GREAT FOR:

- Full color on light & dark garments
- Semi-matte, thin, opaque finish
- Fast production

CAD-COLOR® Soft Opaque II is the super soft, thin printable heat transfer vinyl for vivid colors and a soft finish even on dark substrates. This material quickly applies at a low temperature to prevent scorching and features an incredible fast dry time! Soft Opaque II is designed for easier masking, quick production, and a feel that customers will love.

THIN & STRETCHY

Soft Opaque II is thin and stretchy for a final application that won't weigh down even the softest, stretchiest material.

EXCELLENT OPACITY

CAD-COLOR® Soft Opaque II is as thin and stretchable as SupertTEK® Matte Clear, but allows for vivid color even on dark garments – not just white or light colored substrates.

FAST PRODUCTION

Unlike our other printable CAD-COLOR products, Soft Opaque II has a one step, low temperature, fast application time. A hot peel means less waiting and more production.
