

CAD-CUT® Chroma Bling

Eye-Catching Iridescence

CAD-CUT® Chroma Bling is unlike any other heat transfer material on the market today. Create unique designs with this special effect vinyl that changes color based on lighting and the garment's color, giving you creative options for designs that are sure to sell.

GREAT FOR:

- Unique iridescent looks
- Vibrant colors that shift with the light
- Children's clothing

ONE MATERIAL, MULTIPLE LOOKS

Soft translucent metallic finish with colors that shift depending on what color fabric you apply them to. On dark fabrics, expect a shimmering gold or bronze, and on light fabrics, a brilliant silvery blue. This multi-tonal look shifts with the light too, creating an incredible eye-catching finish.

UNIQUE HIGH GLOSS SHEEN

Chroma Bling is sure to excite your customer with its shimmering look. No other material has this high gloss look that borders on metallic. There's nothing like the finish of CAD-CUT® Chroma Bling.

WATCH NOW
