STAHL'S Hotronix®, a GroupeSTAHL company, designs, engineers, and manufactures a full line of the world's most innovative and technologically advanced heat press machines including its patented line of FUSION® heat presses with the goal of exceeding customer expectations at a competitive cost. The grant of US Patent No. 8,418,739 is explicit recognition by the United States Patent and Trademark Office of the technological edge provided by Hotronix® FUSION® heat presses. Proudly made in the USA and engineered by experts who understand heat printing, Hotronix® FUSION® heat presses are product safety certified.

STAHL'S has more than two dozen issued patents and pending applications as well as dozens of federally registered trademarks. Millions of dollars are invested on research and development to design the most technologically advanced heat presses on the market.

As an industry-leading heat press manufacturer, STAHL'S enforces its patents, copyrights, and trademarks worldwide. Parties found to violate the valuable intellectual property rights for Hotronix® FUSION® heat presses should appreciate that they will be subjected to legal action including litigation.

For more information, to locate a dealer, or make a dealer inquiry, call (800) 727-8520 or visit Hotronix.com.
